

DUAL CONTROLS

2 lever control allows opening & closing of each lid. Operating off of trucks hydraulics or independent electric hydraulic pump.

FRONT ASSEMBLY

Reinforced front assembly lids with bolt hole reinforcement to prevent collapse & heavy duty box section supporting linkage.

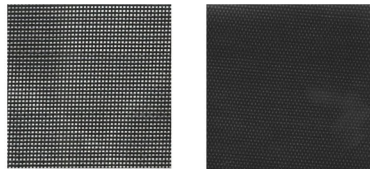

MAINTENANCE FREE HINGES

Heavy duty 6mm steel hinges built with maintenance free UHMW polymer bushes

FOLDS FLAT TO BODY

Each lid rotates 270° to fold flat to the trailer body. Opens & closes in less than 12 seconds. Overlapping lids prevent material escaping.

TARP

Available with mesh sheets as standard or with PVC cover as an optional extra. Securing to framework easily using zipties.

HEAVY DUTY FRAMEWORK

32mm with 3mm wall with bolt hole reinforcements. Powder coated for maximum corrosion protection.

DoubleCover

Sheeting System

The DoubleCover is a fully automatic sheeting system that allows your driver to stay safely at ground level, the system uncovers both lids in around 25 seconds folding flat to the trailers body.

British built quality, manufactured for strength and durability with heavy duty hinges built to take the most you can throw at them. All steelwork is powder coated for maximum corrosion protection with a new additional structural improvement designed to ensure that the framework will not collapse when bolts are over tightened.

Fits all walking floor and ejector trailers as well as bulk rigid tippers.
